MacBook

LMP Battery MacBook 13" Alu unibody

PRODUCT OVERVIEW

Our genuine LMP batteries delivers highest performance and a long battery life. They can be charged without any loss of quality despite not being fully charged or discharged.

All batteries in general have life cycles lasting over a few hundred times. The performance and battery time usually decrease with the age of the battery.

If your current battery lasts less than 90 minutes it's time for a new battery to provide your notebook with the full battery capacity again.
